India Ratings Affirms Axis Bank at 'IND AAA'; Outlook Stable

May 11, 2022 | Banks

India Ratings and Research (Ind-Ra) has affirmed Axis Bank Limited's (Axis) Long-Term Issuer Rating at 'IND AAA' with a Stable Outlook and Short-Term Issuer Rating at 'IND A1+'. The instrument-wise rating actions are as follows:

Instrument Type	Date of Issuance	Coupon Rate (%)	Maturity Date	Size of Issue (billion)	Rating/Outlook	Rating Action
Basel-III compliant Tier 2 bonds *	-	-	-	INR100	IND AAA/Stable	Affirmed
Basel III AT1 bonds *	-	-	-	INR35 (reduced from INR70)	IND AA+/Stable	Affirmed

* Details in Annexure

The affirmation of Axis's Long-Term Issuer Rating factors in its large, pan-India franchise, on both asset and liability sides. It is the third-largest private sector bank with about 6% market share in terms of advances. A diverse business mix, as reflected in its well-spread out loan portfolio, with over half of it being granular retail, is also supportive of the ratings. The bank's focus on the liability side has resulted in a stable funding profile, with the current and savings account (CASA) ratio at 45.0% at FYE22, but still below median levels within its peer group. Furthermore, the bank's existing capital buffers and the ability to raise capital are factored into the ratings.

The Stable Outlook reflects Ind-Ra's expectation that Axis's reasonable capital buffers, strong provision coverage ratio (PCR) and additional provisions (which are not included in the PCR) would provide cushion against any near-term shocks. While Axis reported the highest-ever profitability in a decade in FY22, further improvement on a sustainable basis in-line with the management targets and successful integration of Citibank N.A.'s (IND A1+ (<https://www.indiaratings.co.in/pressrelease/56612>)) retail franchise while keeping customer and employee attrition to a minimum will be key monitorable over the near term.

For AT1 instruments, the agency considers the discretionary component, coupon omission risk, and the write-down/conversion risk as the key parameters to arrive at the ratings. The agency recognises the unique going-concern loss-absorption features that these bonds carry and differentiates them from the bank's senior debt, factoring in an increased probability of an ultimate loss for investors in these bonds.

Key Rating Drivers

Improved Asset Quality and Profitability: Since FY20, in addition to creating the COVID-19-related buffers, the bank has tightened its rule-based provisioning on unsecured retail assets, provided fully for outstanding security receipts, improved provision coverage sharply for the small and medium enterprises (SME) portfolio and is holding higher than required provisions against the assets restructured under the Reserve Bank of India's one-time debt restructuring window. Furthermore, the overall PCR improved by 237bp yoy to 74.7% in 4QFY22, with the retail book carrying a PCR of 61% (80% of the retail book is secured and 47% is towards home loans and loan against property segments), SME at 75% and corporate at 80%. The bank's net non-performing asset (NPA)-to-common equity tier-I (CET I) capital for 4QFY22 stood at 5.0%. At end-4QFY22, Axis held additional provisions (not included in the PCR) of INR124.3 billion which constituted 2.3x of the net NPA.

The bank's focus on building a quality book continues with incremental additions in higher-rated categories, resulting in an increased share of 'A-' and above rated entities in the overall mix of the corporate and a similar movement in SME advances as well. While uncertainty continues to prevail around the impact on asset quality from the future waves of COVID-19 and the ultimate slippages from the restructured and emergency credit line guarantee scheme where the bank holds a relatively smaller than peer portfolio, a strong PCR, along with additional provisions, provides comfort.

Axis's average return on asset (ROA) increased to 1.2% in FY22 (FY21: 0.7%; FY20: 0.2%), moving steadily towards its pre-FY17 average ROA range of 1.6%-1.7%, as credit costs sustain at or below Axis's long-term estimate of 110bp. Even the operating buffers (pre-provisioning operating profit/provisions) improved significantly to 3.4x in comparison to 1.6x in FY21 and an average of 1.4x over FY17-FY21.

Healthy Capital Buffers: At end-FY22, Axis's CET-I capital was healthy at 15.24% and its total capital adequacy ratio at 18.54%. Furthermore, the bank's ability to raise equity capital from the markets is reflected well with it raising INR338 billion over FY18-FY21. The agency believes Axis is in a comfortable position to absorb elevated levels of asset quality stress, should the need arise. This is because it had a provisions coverage ratio 74.7% at FYE22, an improving rating profile for the corporate and SME portfolios and additional provisions (COVID provisions and higher than regulatory standard asset provisions). The proportion of risk weighted assets to total assets stood at 61% in FY22 (FY21: 64%; FY20:67%; FY19: 69%; FY18: 75%; FY17: 79%) and the agency believes this is likely to inch up over the near-to-medium term with the bank focusing on growing the mid-corporate and SME portfolios.

With the bank looking to outpace banking system credit growth which itself has moved to about 11% recently along with the acquisition of Citibank N.A.'s (India Branch) retail franchise underway, the agency believes the bank is likely to raise equity capital over the next couple of years. Strong internal accruals with a revival in profitability will partially offset the requirements on an immediate basis even as the bank remains committed to operating with buffers at least 300-400bp over the minimum regulatory requirements for capital.

Continuing to Build Presence Across Financial Services Value Chain: Axis is scaling up its presence across the financial services value chain, with presence in businesses such as brokerage, asset management, life insurance, investment banking and payment platforms. The bank also has a non-banking financial company - Axis Finance Limited (IND AAA/Stable (<https://www.indiaratings.co.in/pressrelease/55289>)) - providing real estate financing, securities-backed lending services and other retail financial products. Overall, the bank's subsidiaries have been growing in size and scale as Axis continues to make investments in building these capabilities. The contribution of the subsidiaries to the consolidated profitability remains constrained in comparison to comparable peers.

Liquidity Indicator – Adequate: Axis maintained a cumulative funding deficit of 6.7% in the up to one-year bucket as a percentage of the total assets at end-3QFY22. Axis also maintained 23.8% of its total assets in balances with the Reserve Bank of India and in government securities during 3QFY22, to meet its short-term funding requirements. In addition, the bank had a comfortable liquidity coverage ratio of 116% in 4QFY22, sufficiently above the regulatory requirement of 100%.

Liability Engine Needs to Perform Better: Axis's CASA ratio improved only marginally to 45.0% at FYE22 (4QFY21: 44.9%), with CASA and retail term deposits growing at 16.4% yoy and 4.0% yoy, respectively, in comparison to the overall deposit growth of 17.7% yoy. The share of retail term deposits declined to 34.9% of overall deposits in 4QFY22 from 39.5% in FY21 with non-retail term deposits growing robustly at 58.0% yoy in 4QFY22. The cost of funds declined to a recent low of 3.77% in 3QFY22 but increased to 3.83% in 4QFY22 (down from recent peak of 5.7% in 1QFY20). The bank remains focused on increasing the CASA ratio further and improve the profile of deposits which should also aid the margins. Axis's concentration in deposits remains higher than comparable 'AAA' rated peers, with the top 20 depositors constituting 7.9% of the overall deposits in FY21 but has declined from 9.2% in FY20.

Acquisition of Citibank N.A. (India Branch) Retail Business – Integration is Key: Ind-Ra believes the transaction strengthens the franchise of Axis Bank with the addition of 2.5 million Citibank credit cards, INR1109 billion in assets under management from the Citi Wealth and Private Banking Franchise, deposits of INR502 billion (81% is CASA), 1,600+ Suidha corporate relationships with more than 1.0 million salaried customers (average per month salary of INR70,000) and Citibank phone banking support and 3,600 employees. This further provides an opportunity to cross sell to Citibank's premium and affluent customer base. A potential risk is the integration of the franchise and the ability to retain the customers and employees which will be a key monitorable over the near-to-medium term. As part of the deal, Axis has built-in safeguards whereby it has a formula-driven clause which allows them to adjust the purchase price in case of an exit of customers.

Gap on NIMs with Peers to be Bridged Over Next 2-3 Years: The gap between the NIMs for the bank and its comparable AAA rated peers widened to 40-50bp at FYE22. Over the next two-to-three years, the management plans to calibrate levers both on the deposit and asset side which will aid in bridging this gap. The agency believes with a stable and tenured management team in place and the strategic plan in play, the gap in margins is likely to reduce incrementally and it will remain a key monitorable over the near-to-medium term.

Rating Sensitivities

Negative: The Outlook could be revised to Negative if the asset quality starts deteriorating sharply and the credit costs are high on a sustained basis. The ratings could be downgraded if there is a material impact to Tier I capitalisation levels with CET I falling below 11.0% on a sustained basis, net NPA to CET I capital rising sharply higher-than-comparable peer group, significant erosion of franchise – reduction of deposits or advances market share, all on a sustained basis, or a weakening of the relative competitiveness in the banking space. Weakened liquidity or funding profile may also result in a negative rating action.

ESG Issues

ESG Factors Minimally Relevant to Rating: Unless otherwise disclosed in this section, the ESG issues are credit neutral or have only a minimal credit impact on Axis, due to either their nature or the way in which they are being managed by the entity.
