Overview of Operations

Corporate Banking

Products and Services

The Bank offers a wide spectrum of financial services to the corporate sector. The Bank serves the large corporate sector, the growing SME sector and the agricultural sector. A broad classification of products and services offered by the Bank is set out below.

Fund-based products. Loans and advances for working capital, corporate finance and project finance.

Non-fund-based products. Non-funded advances such as documentary credits, stand-by letters of credit and guarantees.

Fee-based services. Including fund transfers, cash management services, collection of Government taxes, trade services and loan syndication.

Other products and services offered include time deposits and current accounts (checking accounts). These products and services are delivered to customers through a network of branches, correspondent banking networks, phone banking and the Internet.

Fund-Based Products

Fund-based limits are generally granted by way of overdrafts, cash credit, demand loans, term loans and bills discounted. Generally, the purpose, the security offered, size of advance, repayment terms and requirements of the customer determine the type of facility to be granted.

Working Capital Finance

Cash credit, working capital demand loans and overdraft facilities, which are the most common forms of working capital financing, are funded facilities usually secured by current assets such as inventories and receivables. These facilities are generally extended for a period of one year. In almost all cases, facilities are subject to an annual review and are generally repayable on demand. Interest is collected on a monthly basis, based on daily outstanding amounts.

Bill discounting involves discounting negotiable instruments, which are generally issued for trade receivables. These can also be re-discounted with other banks if required.

Project and Corporate Finance

The Bank provides project finance to companies in the manufacturing, service and infrastructure sectors typically by way of medium and long-term loans. Corporate finance is offered to customers based on the Bank's appraisal of the quality of management, industry, prospects, business model and financial strength of the firm. This financing is generally provided by way of term loans of various tenors in Indian rupees, and in foreign currencies to a limited extent. The Bank offers asset-based lending such as receivable financing and also offers customised corporate finance products to meet specific customer needs.

Non-fund-Based Products

Documentary Credits

The Bank provides documentary credits to customers to meet their working capital requirements as well as for capital equipment purchases. Documentary credits are approved together with a working capital assessment or a project finance assessment. Typically, a working capital line can be drawn down on a revolving basis over the term of the facility. Customers pay fees for draw downs of the documentary credit and the Bank may require additional collateral by way of a cash margin, which depends on the risk perception of the transaction.

Guarantees

Guarantees, which also include "Stand-by Letters of Credit", can be drawn down in a revolving manner over the life of the facility. Guarantees are also assessed during the course of working capital requirements. Guarantees are issued for various purposes such as bid bonds, performance guarantees on behalf of borrowers for execution of contracts, deferral or exemption from payment of statutory duties against performance obligations, advance payments, release of retention monies and other purposes.

The term of guarantees is generally 36 months or less, although certain guarantees with a longer term may be approved. As with documentary credits, the Bank sometimes obtains additional collateral by way of cash margin which, in the case of certain types of guarantees, may be as much as 100 per cent.

Fee-Based Services

Fee income from corporate banking services (which includes fees from Credit, Business Banking and Capital Markets) constitutes one of the significant revenue streams of the Bank. The Bank offers a variety of fee-based

services, including cash management services, collection of commercial taxes, trade services, remittances, collections and loan syndication. In addition to these traditional fee-generating products and services, the Bank also offers tailor-made products on fee-basis to address specific corporate customer needs through a Structured Products group.

Lending to MSMEs and SMEs

The Micro, Small and Medium Enterprises (MSME) segment is an area of intense focus for the Bank, as it generates higher yield and helps in diversification of risk. MSMEs offer good business potential both for fund and non-fund based credit and cross selling of products.

The Bank continued its focus on the MSME segment by providing timely and adequate credit to customers with quick turnaround time. The segment offers schematic and non-schematic products including term loans and working capital finance, depending upon the specific requirement of clients.

Under schematic lending, specific loan-based products have been devised to target the requirements of specific customers and loans are made available based on predetermined features, parameters and levels. Loans not falling under any of the product-based schematic lending schemes are treated as non-schematic lending.

The Bank's Small and Medium Enterprises (SME) business segment achieved growth by implementing comprehensive strategies and focusing on specific industry segments and customer preferences.

The Bank continues to pursue a two-pronged strategy of deepening existing relationships and widening its customer base.

Priority Sector Lending

Commercial banks in India are required by the RBI to lend 40 per cent of their adjusted net bank credit of the previous year to specified sectors known as "priority sectors", subject to certain exemptions permitted by the RBI from time to time. Priority sector advances include loans to agriculture, SME, microfinance loans to sectors deemed "weaker" by the RBI, housing and education finance up to certain ceilings, lending for specific infrastructure projects and investments in instruments issued by specified institutions. The Bank is required to comply with the priority sector lending requirements as at the last reporting Friday of March of every fiscal year.

Agricultural Financing

RBI requires the Bank to lend 18 per cent of their adjusted net bank credit of the previous year to the agricultural sector. In light of future business prospects in the Indian agricultural and related sectors, the Bank has identified agricultural lending as an area of potential growth.

The Bank has a diverse range of schematic products such as tractor loans, the Kisan Credit Card (credit facilities to farmers for various requirements), loans against pledges of gold ornaments and contract farming to cater to the varied requirements of the agricultural sector.

The Bank has also introduced additional schematic products such as advances to commission agents, a comprehensive scheme for warehouse receipt financing and cattle loans. The agriculture business of the Bank is driven through branches attached to agricultural clusters and some stand-alone branches which facilitate the Bank's growth in agricultural lending. In order to provide a strategic focus to agricultural lending, the Bank has adopted cluster-centric approach for agricultural lending in areas the Bank identifies where it believes agriculture is very intensive and where a potential market exists for the Bank's agriculture finance. To strengthen the agricultural lending of the Bank, Agri Business Centres & Agri Clusters have been formed. In addition, the Bank has established relationships with various companies and cooperatives in the plantation, poultry, food processing and seed sectors to cater for their project financing and working capital requirements.

The Bank's strategy in agricultural lending is based on a comprehensive view of the agricultural value chain, a focus on diversification and partnerships with other companies in the agricultural sector, micro finance and other rural institutions and non-governmental organisations that have close links to the agricultural sector. The Bank has also devised a separate risk evaluation model for agricultural loans with an objective to measure and mitigate the risk involved in financing this sector.

There has been considerable improvement in the rural infrastructure in select geographies in India in recent years. The Bank's agricultural financing initiatives are largely focused on regions where the need for credit has consequently increased. The Bank intends to develop its agricultural finance business by:

- offering a comprehensive range of products to individual farmers in select geographies covered by an adequate number of rural branches;
- offering suitable credit and other banking products to farmers supplying inputs to large corporations in agri-business (contract farming);
- offering suitable products to various members in the supply chain in the agriculture business (such as warehouses and cold storage units); and

- leveraging upon the Bank's technology platform to distribute the Bank's offerings in rural areas in a convenient and cost effective manner.

Housing Finance

RBI requires banks in India to lend up to 3% of their incremental deposits in the previous fiscal year for housing finance. This can be in the form of home loans to individuals (up to a certain ceiling) or investments in debentures and bonds of the National Housing Bank and housing development institutions recognized by the Government. A portion of housing finance lending qualifies as priority sector lending.

Export Credit

RBI requires banks to lend to exporters, as part of its directed lending requirements, at concessional rates of interest. Pre-shipment and post-shipment export credit requirements applicable to exporter borrowers are provided both in Indian rupees and foreign currencies. RBI requires banks to lend, in the form of export credit, 12 per cent of their net bank credit for each fiscal year-end. This is in addition to the priority sector lending requirement. However, credits extended to exporters that are small-scale industries or small businesses may also meet part of the priority sector lending requirement. RBI provides export refinancing for an eligible portion of total outstanding export loans at the bank rate prevailing from time to time. Banks also earn fees and commissions from these exporter customers, in addition to the interest income earned on export credits, from fee-based products and services provided to them.

Business Current Accounts

The Bank offers a range of current account products based on value as well as industry sectors in order to meet the needs of various customer segments such as SMEs, traders, exporters, large corporations and other institutions. These products offer flexibility to customers to choose from different options with varying minimum average quarterly balance commitments and charge structures. In addition to conventional banking facilities, these accounts offer a multi-city, AT PAR payable cheque-book facility and an "Anywhere Banking" facility across all of the Bank's branches. In addition to the Bank's branches and ATMs, customers can access and conduct transactions in their accounts online through Corporate I-Connect, the Bank's internet banking platform, or can access account information through a tele-banking facility and mobile banking facility. Customers are subject to transaction charges including charges for non-maintenance of minimum balances.

Cash Management Services

The Bank offers Cash Management Services such as collection, payment and remittance services with a focus on improving clients' cash flows. As of the date of this Offering Circular, the Bank has 692 cash management services locations as compared to 517 in the previous financial year. Government Business and Tax Collections

In July 2001, the Bank became the first Indian private sector bank to be authorised by the Government and RBI to collect taxes on behalf of the State of Andhra Pradesh on a pilot basis. In October 2003, the Bank's authorisation was extended, permitting it to offer banking services to various Central Government ministries and departments and other State governments and union territories, including collection of direct and indirect taxes on behalf of the Government and State governments.

Currently, the Bank accepts income and other direct taxes and central excise and service taxes through its authorised branches. The Bank has strengthened its association with e-Governance initiatives of State governments by extending its banking services for the G2B space with e-Procurement Projects of the government of Karnataka, Gujarat, Bihar, Orissa, Chhattisgarh and Punjab.

The Bank also seeks to participate in the e-Governance initiatives of various government departments (such as Railways and Defence establishments) with offerings of single window payment system at which the Bank undertakes payments to suppliers, contractors and other vendors through multiple electronic channels like Electronic Fund Transfers/Non-Electronic Fund Transfers.

The Bank receives fee income on all State government revenues collected at these citizen facilitation centres and also earns income on non-interest bearing deposits made into user department accounts opened by the Bank in connection with these services.

A senior Bank official oversees the anti-money laundering activities and ensures compliance with the Bank's policy.

Strategy

The key elements of the Bank's business strategy going forward are to:

➤ **Increase the Bank's market-share in India's expanding financial services industry through a continued focus on the retail financial services sector.**

The Bank aims to achieve this by providing banking convenience to customers and by offering differentiated products to meet the specific needs of disparate customer segments. The Bank is sensitive to such product differentiation and the Bank's management believes that such customer-specific orientation will strengthen its future profitability.

➤ **Improve profitability through emphasis on core income streams such as net interest income and fee-based income.**

The Bank intends to achieve this by expanding its distribution network and alternate delivery channels such as internet banking aimed at the acquisition of low and/or non-interest bearing savings bank and current account deposits.

➤ **Sustain its focus on improvements in loan and investment portfolio quality.**

The Bank aims to achieve this through rigorous credit and risk appraisal, sound treasury management, product diversification and strong internal controls.

➤ **Continuously upgrade the Bank's information technology systems.**

The Bank aims to maintain a scalable computing infrastructure backed by a robust network architecture, which delivers service across multiple channels for customer convenience and cost reduction through operational efficiency. In order to retain a competitive edge, the Bank's information technology department ensures that the Bank's technology is continuously upgraded.

➤ **Engage in new initiatives such as wealth management.**

The Bank intends to increase its range of services so as to enable the Bank to advise and cross-sell third party products to high net worth customers.

➤ **Increased lending to SMEs and agricultural clients.**

The Bank intends to achieve this through a network of rural and semi-urban branches supported by organizational reinforcement in the form of SME cells and agriculture clusters.

➤ **Strengthening of the international remittance business.**

The Bank aims to achieve this through tapping the high-volume remittance business in the Persian Gulf by utilising its current strategic alliances with various banks and exchange houses in that region. The Bank intends to forge many more alliances of this nature in other geographic regions so as to enable the Bank to become a significant player in this business.

➤ **International presence.**

With the global integration of the Indian economy and the consequent two way flow of funds and services, the Bank has identified international banking as a key opportunity to expand the skills and strengths built in its domestic operations by establishing presences at strategic international financial hubs in Asia. The first overseas branch of the Bank opened in Singapore in April 2006. Subsequently, a branch in Hong Kong and a representative office in Shanghai also commenced operation during the year 2006-07. In addition, the Bank has also set up a branch in the DIFC-Dubai and a representative office in Dubai, United Arab Emirates (UAE).
