Illustration: If the customer spends Rs. 50,000 in a billing cycle with the following break up of spends –

- CC on UPI QR transactions done through supermoney App: Rs. 30,000 | Other eligible spends: Rs. 20,000
- Out of these “Other spends”, Rs. 10,000 was an EMI purchase.
- Thus, the total spends eligible for cashback would only be Rs. 30,000 + Rs. 20,000 – Rs. 10,000 (EMI transaction) = Rs. 40,000

The cashback for the billing cycle in example would be calculated as follows:

3% of Rs. 30,000 = Rs. 900

1% of Rs. 10,000 = Rs. 100

Thus, the total cashback for the example would be Rs. 900+100 = Rs. 1000.

However, considering the Cashback is capped at INR 500/statement cycle, the total cashback to be credited to customer at the end of statement cycle will be INR 500.

- Non-customer-initiated payment/credit such as Merchant refund/cashback/charge reversals etc. received into the credit card account will **not** be considered as a payment towards the outstanding of the card. However, such credits will be considered to compute the subsequent month’s dues.
- Cashback earned for the purchases during the current billing cycle will be credited in the next billing cycle 3 days prior to the statement generation date i.e. if the statement date is 15th March, cashback earned in the Feb month cycle (16th Jan-15th Feb) will be credited on 12th March.
- Cashback earned will be computed based on spends during the statement period minus any returns or refunds during the same period.
- In case the purchase/ transaction is returned/ cancelled/ reversed post statement generation date, cashback toward such transactions will be debited on the date of such purchase/ transaction reversal.
